

Jewish Celebrations

There are many Jewish festivals celebrated through out the year. People with diabetes may need to plan ahead for the feasting and fasting to reduce the effect on diabetes.

Food plays a big role at each festival, with traditional foods and large family meals.

People with type 2 diabetes do not necessarily need to stop eating traditional festive foods and even sweet foods, honey and alcohol (for those old enough), can be enjoyed in moderation. It is important to remember to eat well, and stay active, as this will help you to manage blood glucose levels.

Fasting

Fasting may take place during jewish festivals and celebrations. If considering fasting, please consult your diabetes team or rabbi. You might be exempted from the fast, or your management of the fast might be different because of diabetes.

How to Fast Safely When You Have Diabetes

There are three main risks associated with fasting for people with type 2 diabetes. Hypoglycaemia (low blood glucose), hyperglycaemia (high blood glucose) and dehydration.

Some people might be asked to monitor glucose levels by using a glucose monitor or a glucose sensor. checking glucose levels can prevent hypo episodes and keep you safe if you decide to fast.

More information about the symptoms and management of hypoglycaemia and hyperglycaemia can be found [here](#).

Feasting

During festival season, it can be difficult to moderate your intake of the lovely celebration foods on offer which may lead to high glucose levels.

During festival periods, eating lots of high fat, high carbohydrate, calorie filled foods after any fasting period, may cause high glucose levels for a long time, particularly overnight.

Healthy Festival Food Tips

Rosh Hashanah (new year celebration)

This is the Jewish new year, Rosh Hashanah celebrates the creation of the world and marks the beginning of the days of awe, a 10-day period which builds up to the Yom Kippur holiday.

Traditional foods for Rosh Hashanna

Tzimmes

Honey Cake

Brisket

Dried Fruits

Some main dishes are cooked with honey/sugar this would have implications for diabetes and weight.

Enjoy challah in moderation as it contains more sugar than ordinary bread. To make your recipe healthier, swap in some wholemeal flour and reduce the amount of sugar and olive oil.

Fill up with nutritious foods such as fish, couscous and vegetables. choose Basmati or long grain rice, Quinoa, bulgur or buckwheat.

Homemade honey cake can be made healthier with ground almonds, nuts and seeds, increasing the healthy fats and protein content.

Purim

Hamantaschen

Make your Hamantaschen healthier by swapping the filling for a mix with poppy seeds, nuts or dates and by using less sugar.

Celebratory meal Seudat Purim

Choose slow acting starchy carbohydrates such as basmati rice, pasta, new potatoes, quinoa, couscous, multiseeded bread or spelt sourdough challah and lentils or beans.

Instead of buying hamantaschen try making your own and use almond meal instead of flour. Almond meal is lower in carbohydrates and so has less impact on blood glucose levels. It is also a good source of protein and heart healthy fats.

Pesach (passover)

This spring festival falls around March or April time. The week long festival has a number of important rituals, including a traditional Passover meal known as a Seder.

Matzah

These simple and plain tasting flatbreads are a form of starchy carbohydrate. Healthier swaps would include adding a savoury topping like smoked salmon or cheese instead of jam.

Replace matzah for breakfast with a natural yoghurt and fresh fruit or a vegetable omelette.

Hanukkah (the festival of lights)

An eight-day jewish celebration often called the festival of lights. The holiday is celebrated with the lighting of the menorah, traditional foods, games and gifts.

Potato Latkes can be made using sweet potato, shallow fry or bake the potatoes using less oil.

For frying into the pan. One teaspoon of olive or rapeseed oil per person.

Activity And Lifestyle During Festive Periods

Children and young people should aim to be active for at least 60 minutes every day, including during festival periods. This will also help to reduce glucose levels and help insulin to work better.

Tips To Increase Activity

Go for a morning walk or do a workout at home with weights or steps. Even doing chores is a good way to be active.

You could walk to and from the synagogue with family members or friends.

Limit intense exercise during times of fasting.

Sleeping Well

Sleeping well is very important for general health and a good way to help keep your blood glucose levels steady.

Having a big meal close to bedtime may make you feel uncomfortable and you might find it difficult to sleep.

Switch off from screens a few hours before bed.
