

Goals of Diabetes

Insulin

I can use my insulin pump and insulin pen to give insulin at meal times with adult supervision.

I'm learning about my insulin doses, but I shouldn't change them without speaking to my parents.

I need to look after my injection and cannula sites and rotate them so they work well for me.

Long acting insulin is used for background insulin.

All insulin needs to be stored in a fridge.

I help with my injections and changing infusion sites and I know how to give an injection in case my pump fails.
